

# OMEGA JR

## UNIVERSAL SITE INTERFACE

*Progressive's Omega JR is the latest member of our Omega line of universal site interfaces. Its purpose is to standardize the dispenser command/request protocol, thus simplifying POS development and saving time and money.*

The Omega JR is the economical universal site interface for the petroleum industry. It installs easily and is so powerful, it can seamlessly control 1 to 32 dispenser positions. Regardless of the dispenser brand in use, or combination of brands, the Omega JR standardizes the command/request protocol.

Progressive has simplified system development by handling the dispenser protocol. And now PIE has even simplified POS development, and assured compatibility, by following OLE2 for Windows protocol. Our software interfaces ensure the smoothest dispenser integration in the business, shortening the overall system development time significantly.

Cost effective. Beats all its competition.

Controls 1-32 dispensers.

Works with all major dispenser brands.

Simple installation and service.

Rapid application development.

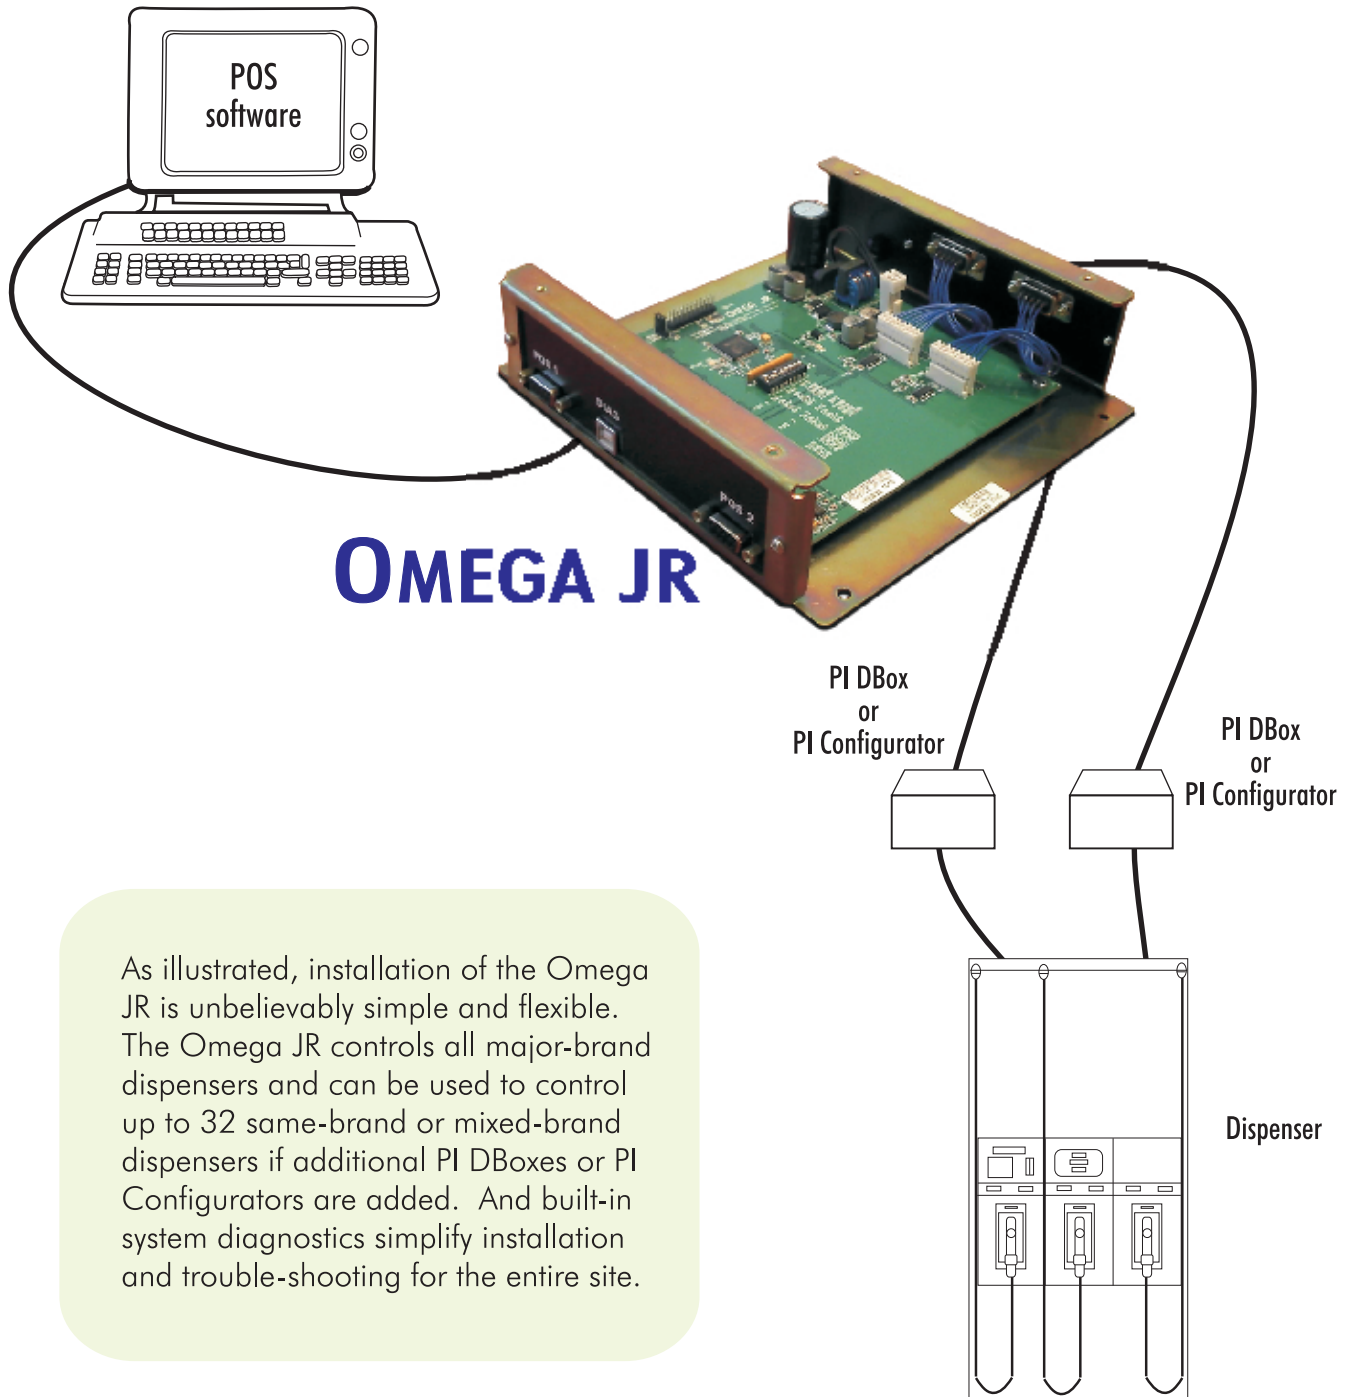

Uncomplicated, yet powerful, protocol.

Easily upgraded.

Seamless system integration.

# OMEGA JR Technical Features and Specifications

## OMEGA JR

As illustrated, installation of the Omega JR is unbelievably simple and flexible. The Omega JR controls all major-brand dispensers and can be used to control up to 32 same-brand or mixed-brand dispensers if additional PI DBoxes or PI Configurators are added. And built-in system diagnostics simplify installation and trouble-shooting for the entire site.

### PROGRESSIVE INTERNATIONAL ELECTRONICS

*Progressive International Electronics' patented technologies ensure state of the art control capabilities for our worldwide market. Our staff is highly trained and ready to assist you with everything from product development to providing solutions to POS dispenser control.*
